Hidden Valley Incorporates Modular Technology

Tucson, Arizona – February 24, 2009

Modular Mining Systems, Inc.—the world leader in information management solutions for mining operations—announces that Hidden Valley Mine, a joint venture between Harmony Gold Ltd. and Newcrest Mining Company Ltd., will integrate the IntelliMine® asset management suite into its operations this spring.

Technology to be installed includes the DISPATCH® mine management system, the MasterLink® wireless network, and ModularReady® interfaces to Komatsu VHMS and PLM systems. Additionally, the mine hopes to implement the MineCare® maintenance management solution in the future.

The mine chose Modular because of the company's field-proven products and specialized local support services, including on-site engineering support, training, remote data analysis, and daily system health monitoring.

About Hidden Valley Mine

Hidden Valley, located in the Morobe Province of Papua New Guinea, is a joint venture between Harmony Gold Ltd. and Newcrest Mining Ltd. Currently under construction, the gold and silver open-pit operation is expected to process around 4.2 million tonnes of ore per year. For more information, please visit http://www.harmony.co.za/b/ops_png.asp or <http://www.newcrest.com.au>.

About Modular Mining Systems, Inc.

Modular is the market leader in providing powerful information management solutions to meet the needs of both open pit and underground mining operations worldwide. Modular sales and support offices are located in all key world-mining markets. For more information, visit the Modular website at <http://www.modularmining.com>.
