## **SouthGobi Selects Modular for Mine Management Solution**

**Tucson, Arizona – June 15, 2011**

Modular Mining Systems, Inc. (Modular), the world leader in information management solutions for mining operations, announces that SouthGobi Resources, Ltd. has chosen to implement the Modular® IntelliMine® Integrated Asset Management Suite at its Ovoot Tolgoi operation in southern Mongolia.

The installation will include the DISPATCH® fleet management system, PowerView™ reporting software, MineCare® maintenance management system, and ProVision® machine guidance solution for shovels, dozers, and drills. "We chose Modular because the IntelliMine suite covers all aspects of our business," said Justin Kapla, General Manager, Ovoot Tolgoi Operations. "From safety, to asset management, to increased productivity, they have solutions that meet all of our needs. We look forward to the value their products will add to our business."

With the new technology in place, the site will receive real-time exchange of data and feedback regarding fleet and operations, a central source of information and reporting across multiple departments, and real-time monitoring and troubleshooting capabilities for maintenance, among other benefits. For Modular, this will be the first installation in Mongolia; furthermore, it will be the first installation of any major mine management system in the country. "Modular is extremely excited to gain a world-class partner in SouthGobi Resources, in a region that is fast becoming a significant global mining region" said Modular VP of Business Development, Anthony Cook. "We are committed to developing our capabilities within Mongolia, and we anticipate other operations in the region to take advantage of Modular's product and service offerings."

### **About SouthGobi Resources, Ltd. and Ovoot Tolgoi**

SouthGobi Resources Ltd. is focused on exploration and development of its Permian-age metallurgical and thermal coal deposits in Mongolia's South Gobi region. The company's flagship operation, Ovoot Tolgoi, is already producing and selling coal to customers in China and has proven and probable surface reserves totaling 106.8 million metric tons. The mining method employed at Ovoot Tolgoi is open-cut terrace, utilizing large-scale hydraulic excavators, shovels, and trucks. This allows for productive open-pit mining in the steep coal seam environments native to the mineral-rich Ovoot Khural basin. The company plans to supply a wide range of coal products to markets throughout Asia. For more information, visit <http://www.southgobi.com>.

### **About Modular Mining Systems, Inc.**

Modular is the market leader in providing powerful information management solutions to meet the needs of both open pit and underground mining operations worldwide. Modular sales and support offices are located in all key world-mining markets. For more information, visit the Modular website at <http://www.modularmining.com>
